Generative Engine Optimization (GEO)

Your Generative Engine Optimization could be better

Your page has some level positioning for Generative Engine Optimization (GEO). GEO is important to ensure LLMs and AI Search Engines can effectively crawl your content and understand the underlying entity structure. Consider additional enhancements to improve visibility in LLMs as this is becoming a rapidly growing traffic source.

Rendered Content (LLM Readability)	✓
Your page has a low level of rendered content which tends to make it more readable for LLMs.	
Rendering Percentage: 10%	
llms.txt	✗
We have not detected or been able to retrieve a llms.txt file successfully.	
AI Crawlers Blocked by Robots.txt	✓
Your robots.txt allows the major AI crawlers to access your site.	
No major AI crawlers are blocked in your robots.txt.	
Identity Schema	✗
No Organization or Person Schema identified on the page.	
The absence of Organization or Person Schema can make it harder for Search Engines and LLMs to identify the ownership of a website and confidently answer brand, company or person queries.	
Entity Definition	✓
Your page clearly defines the entity it represents.	
The page clearly identifies Reliant Plumbing, its founder, core services, service areas, licensing, and residential-commercial customer focus.	
Contact Transparency	✓
Your page clearly provides business details and contact points.	
The page provides multiple phone numbers, email, addresses, license information, contact links, customer portals, and official social profiles.	

Answer Alignment

Your page lacks question-and-answer style content such as an FAQ.

The page contains descriptive service sections but essentially no explicit FAQ, question-and-answer format, or question-based headings.

Citation Readiness

Your page contains easily citable facts, quotes or statistics.

The page includes numerous substantive, self-contained statements describing services, procedures, credentials, service areas, and company history.

Content Structure

Your page is well structured and easy for AI to parse.

The page uses clear headings, categorized service sections, process steps, cards, lists, calls-to-action, and highly scannable visual blocks.

Content Freshness

Your page shows only weak signals that its content is current.

The page offers seasonal specials and claims ten years of experience, but lacks a current publication or update date.

Authority & Trust Signals

Your page shows authority and trust signals, though these could be stronger.

The page presents licensing, insurance, satisfaction guarantees, customer ratings, a founder quote, company history, and numerous local addresses.

On-Page Links

Friendly Links

Some of your link URLs do not appear friendly to humans or search engines.

We would recommend making URLs as readable as possible by reducing length, file names, code strings and special characters.

Usability

Your usability needs improvement

Your page has usability issues across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

Device Rendering

i

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

Google's Core Web Vitals

✗

Your page has failed Google's Core Web Vitals assessment.

Core Web Vitals are UI metrics created by Google that measure page experience and are becoming increasingly important as a ranking factor.

Your page has specified a Favicon.

Email Privacy

No email addresses have been found in plain text on your page.

Legible Font Sizes

The text on your page appears to be legible across devices.

Tap Target Sizing

The links and buttons on your page appear to be appropriately sized for a user to easily tap on a touchscreen.

Performance Results

Your performance could be better

Your page's performance has some issues and room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). We recommend addressing the highlighted factors below.

Website Load Speed

Your page loads slowly.

Page load speed is critical to ensuring good user experience and is becoming a more important ranking factor. Load speed can be impacted by a multitude of factors however and may need technical resources to investigate.
